BEECHJET B400
VH-MGC

One look at the beautiful Beechjet 400XP in flight foreshadows its exceptional performance characteristics. From the ground up, the 400XP incorporates the added measures of strength and reliability that lead to the durability. With its advanced avionics systems, elegantly crafted interior and high efficiency environmentals, the Beechjet 400XP has remained the light jet of choice for those who embrace refined cabin accommodations.

All cabins are not created equal. The design maximises available space for unmatched head and shoulder room. Centre club seating with 360-degree swivel chairs makes conferencing en route more convenient with fully berthable chairs with integrated headrests for those flights that are longer and require adequate rest.
